

Marathon™ SUPER PREMIUM INDUSTRIAL PROPELLER FAN

marathon™
WEG Group

High Air Delivery • Ultra-Low Energy Consumption • Built for Continuous Industrial Duty

Product Overview:

Marathon™ Super Premium Industrial Propeller Fan is engineered for high-performance ventilation in demanding industrial environments. Powered by an IE4 Efficiency Class motor, this fan range delivers exceptional air flow while significantly reducing power consumption and operating costs. Designed for reliability, availability, durability and sustainability, it is an ideal solution for modern industries focused on energy efficiency and performance.

Key Benefits:

- **Power Supply** – AC 3 Phase, 50 Hz
- **IE4 Super Premium Efficiency Motor** – Lower energy losses and reduced electricity bills
- **High Air Delivery** – Efficient ventilation for large industrial spaces
- **Robust Industrial Design** – Suitable for continuous duty applications.
- **Reduced Carbon Footprint** – Supports sustainability and ESG goals.
- **Low Maintenance** – Long service life with consistent performance.

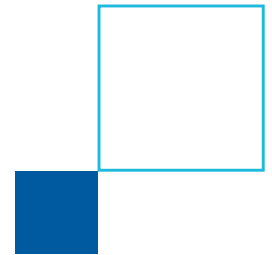

Specification:

Model	Voltage (V)	IKW (in Watt)	Current (Amps)	Speed (RPM)	Air Delivery CMH	Motor Efficiency
SP 91583	415	960	2.1	720	28500	IE4
SP 61083	415	184	0.48	712	8240	IE4
SP 61063	415	440	1.4	950	12000	IE4

Applications:

- Transformer cooling application
- Manufacturing plants
- Warehouses & logistics centres
- Power plants & substations
- Cement, steel & heavy industries
- Workshops & utility areas
- Chiller application
